

CAPABILITY STATEMENT

Yudrio, Inc. is a HUBZone certified boutique Information Technology (IT) solutions provider. We provide the depth of expertise and capabilities of a large company while maintaining the intimacy of a small business. Yudrio supports mission-critical applications by providing innovative, customized, end-to-end services that demonstrate measurable benefits.

We have developed our core competencies to address the needs of the evolving government market by producing sustainable, adaptable and economical solutions that integrate seamlessly within emerging architectures and standards.

Enterprise Content & Case Management Solutions

Yudrio specializes in Enterprise Content, Case and Records Management Systems deployments that are robust, flexible, and scalable using a diverse selection of COTS products including Alfresco, Documentum, Appian, Pega and SharePoint. Our systems adhere to the DoD 5015.2 standard for managing records across the Federal Government. Our enterprise services range from new product implementations to system consolidations which yield high-value ROIs.

Cloud Computing and Enterprise Architecture

Yudrio, Inc. is a cloud integrator with considerable experience in creating and managing time-tested solutions for the Federal Government and private industries. At Yudrio, we understand the cloud and have the experience to transition or extend your current infrastructure both vertically and horizontally. In addition to private clouds, we have experience in technologies such as Azure, AWS and Datapipe. Our skills, knowledge, and experience will lead you through the intricacies of cloud computing while realizing the immediate cost savings.

Application Development and Emerging Technologies

Yudrio was founded on its application development expertise. Today, this expertise remains a cornerstone of the business. Yudrio has a wealth of knowledge in developing agile solutions using emerging web technologies. From enterprise-wide custom solutions to mobile applications, our capabilities allow businesses to achieve their goals with ease.

Full-Scale Testing Solutions

Yudrio has developed a deep expertise in application, security, system integration, automation and performance testing principles. Yudrio's industry-leading test engineers have provided manual, automation, performance and security testing solutions at both the individual application level as well as enterprise level to various Federal Government agencies. With a focus on automation and penetration testing tools such as Selenium and other open source solutions, Yudrio provides full-scale testing solutions to ensure adherence to the most complex business and technical needs.

Cyber Security Solutions

Yudrio's cyber security principles were built on the foundation of its existing competency with systems, applications, and networks. Our staff provides engineered cyber solutions based on a threat matrix and security objectives, a deep understanding of the underlying technologies, and years of experience building secure systems for our clients. Our approach is nimble and uses streaming analytics to accommodate the velocity of enterprise information creation and the business needs.
